

# Demand Builds For Merit Taste Technology.

High and low tar smokers converted as news of 'Enriched Flavor' tobacco spreads.

There is a way to pack flavor—extra flavor—into a low tar cigarette. MERIT proved it.

By cracking cigarette smoke down into separate elements, researchers were able to isolate certain "flavor-rich" ingredients that deliver taste way out of proportion to tar.

The result was 'Enriched Flavor' tobacco. Tobacco that delivers the kind of taste smokers can switch to. And stick with.
